**"EDL provides technologies and engineering to configure systems that meet special and often unique customer requirements. We listen, study, design and deliver value."**

## EDL's Unit Load System

**Superior packaging for bulk shipment needs.**

EDL's Unit Load Systems provide solutions for manufacturers to enclose large, variable sized products for transit. Translucent low density polyethylene film provides both product and handling point visibility during transit, at a significant cost reduction over corrugated based packaging. Opaque film protects from ultra violet radiation exposure during extended periods of outdoor storage.

These systems incorporate our latest proven technology, flexibility, and ease of maintenance. Attributes you can expect from EDL.

We are currently delivering a Unit Load System to a paper converter who wraps pallets of press ready printing paper. Who distributes press ready paper in your area? EDL's Unit Load Systems can be applied to wrapping other large items such as furniture, building insulation, vinyl fence products, and any other bulk or palletized product for shipment.

EDL has over 40 years of experience designing and manufacturing shrink bundling machinery. The expertise gained and the technology developed over the years has

helped us become an industry leader in innovative packaging solutions.

The video for this system and many others can be viewed via the "Login" section of the EDL website. Login is: edlpackaging and the password is: clients. Please contact your EDL Area Sales Manager for further information.

## **EDL's Standard Equipment**

In addition to our acclaimed reputation for delivering "special and often unique" packaging solutions, EDL also supplies a line of standard equipment. Our pre-engineered products include inline, side feed, and semi-automatic systems that can be readily applied to meet and exceed the needs of more common applications. Competitive pricing and short delivery lead times are available on all EDL standard equipment.

This month we are delivering a Monobloc Semi-Automatic (model MSA 42-20-60) System to a customer to wrap packs of moulded pulp egg cartons.

### **EDL's Monobloc Semi-Automatic Wrapper**

Give our standard equipment line a try. Learn more about our standard equipment at [www.edlpackaging.com/edlproducts.html](http://www.edlpackaging.com/edlproducts.html), and then select Bagged, Trayed, or Trayless products. Contact your EDL Area Sales Manager for further information.
