

“EDL provides technologies and engineering to configure systems that meet special and often unique customer requirements. We listen, study, design and deliver value.”

EDL’s Protecta Pack Hibrid System

This system features the protection of our sleeve wrappers with the flexibility of a stretch wrapper. It is an inline system designed to totally enclose large items such as wood products, cabinets and furniture.

Following our tradition of constant innovation, EDL offers our “Protecta Pack Hibrid” system which combines bundling and stretch wrapping technologies. This system applies a sleeve of poly foam, bubble wrap, LDPE or high abuse film to protect the top, bottom, leading and trailing faces and edges of your package. Stretch film is then wrapped horizontally around the pack to secure the over wrapped sleeve in place and to fully enclose the pack. The outer layer locks the protective film around the edges and corners of the package where it is the most vulnerable.

The Hibrid system wraps random sized products, and adjusts the tension of the stretch film to the shape and size of your product.

EDL’S PROTECTA PACK HIBRID SYSTEM

Features of the EDL Protecta Pack Hibrid System:

- *Provides solutions for manufactures to bundle large sized products*
- *Package materials that can be used are poly foam, bubble film, LDPE, or high abuse film*

Benefits of EDL Protecta Pack Hibrid System:

- *Increases protection and ease of handling*
- *Focuses on saving materials and energy by producing a more durable high performance package without the need for a shrink tunnel.*
- *Insures proper protection that allows your customers to provide the quality their customers expect.*
- *Significant labor reduction potential.*

Why EDL?

EDL has over 40 years of experience designing and manufacturing shrink bundling machinery. The expertise gained and the technology developed over the years has helped us become an industry leader in innovative packaging solutions.

Bring us your application and let us apply our Innovative Solutions! Remember we listen, study, design and deliver value to our customers!

The video for these systems mentioned above and many others can be viewed via the "Login" section of the EDL website at www.edlpackaging.com. Login is: edlpackaging and the password is: clients. Please contact your EDL Area Sales Manager for further information.

EDL's Standard Equipment

In addition to being known for delivering "special and often unique" packaging solutions, EDL also supplies a line of standard equipment. Our pre-engineered products include inline, side feed, and semi-automatic systems that can be readily applied to meet and exceed the needs of more common applications. Competitive pricing and short delivery lead times are available on all EDL standard equipment.

This month we are featuring our High Speed Continuous Motion Inline Wrapping System.

New Model: CMILA 22-12 with ST 22-6-78

- Will wrap packs requiring up to 22" film width, 18" product width, and up to 24" length and up to 10" high
- Speed of up to 40 packs per minute
- Machine footprint size of 50" W x 241" L
- Standard electrical supply of 460 volts, 3 phase, 60 HZ, 60 Amps per phase
- GREAT LOW PRICE with IMMEDIATE DELIVERY!

COST: \$86,600

Give our standard equipment line a try. Learn more about our standard equipment at www.edlpackaging.com/edlproducts.html, and then select Bagged, Trayed, or Trayless products. Contact your EDL Area Sales Manager for further information.
