

PACKAGING
SOLUTIONS
from 
Packaging Engineers, Inc.

“EDL provides technologies and engineering to configure systems that meet special and often unique customer requirements. We listen, study, design, and deliver value.”

EDL's Integrated Services offer customers a 1 stop shop for entire scope of work!

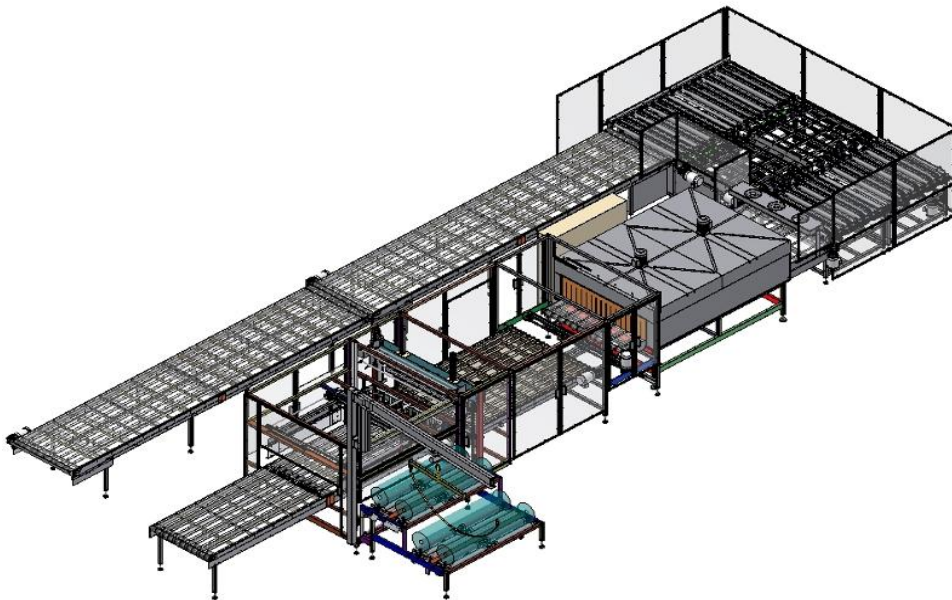

Are you tired of searching for multiple providers to accomplish the needs of your customers? Then search no further-EDL Packaging Engineers can provide you with our Integrated Services for a total solution!

- *Custom Design & Engineering*
- *Ability to do full factory acceptance testing*
- *Integrated controls and programming*
- *Full line Responsibility*

In addition to our expertise in designing and manufacturing shrink bundling and wrapping systems, we offer a broad range of Ancillary Equipment.

- *Infeed and Outfeed Conveyors*
- *Product Inspection Equipment - Checkweighers, Metal Detectors and Vision Equipment*
- *Product Identification - Labeling, RFID Tags*
- *Safety circuits and programming*

EDL Inline Automatic Wrapper
Model ILA 66-12

EDL was faced with a project to wrap stacks of window screens that varied greatly in size and shrink them in a total enclosure.

The EDL Integrated Solution consisted of an Inline Automatic Wrapper Model ILA 66-12 (Maximum Film Width-66" and Maximum Product Height 12") with a High Efficiency Shrink Tunnel Model ST 66-12-144. (Length of Tunnel Chamber 144") The system also included a flighted infeed conveyor with a product centering device, auto-adjusting, continuous motion hot air side seal and trim units, side loading cradles, active spare film cradles, a film splicing system, two 90 degree pop up transfer conveyors and a zero back pressure accumulating conveyor.

[Click here for more details of Panel Solutions](#)

Features and Benefits of the Inline Automatic System:

- *Flighted infeed conveyor allows very light products to be randomly placed on infeed
- *2 - 90 Degree Pop Up Transfer Conveyors
- *Zero back pressure accumulating conveyor returned product back to single operator
- *Increased productivity - 1 operator can load screens onto infeed conveyor and palletize product
- *Process up to 4 packs per minute
- *Savings on materials - reduced corrugated packaging, significant savings using film

Why EDL?

EDL has over 40 years of experience designing and manufacturing shrink bundling machinery. The expertise gained and the technology developed over the years has helped us become an industry leader in innovative packaging solutions.

Bring us your application and let us apply our Innovative Solutions! Remember: We listen, study, design, and deliver value to our customers!

The video for this system mentioned above and many others can be viewed via the "Login" section of the EDL website at www.edlpackaging.com.
