

"EDL provides technologies and engineering to configure systems that meet special and often unique customer requirements. We listen, study, design and deliver value."

EDL's Forming Shoe System

You may be thinking, "EDL doesn't make a forming shoe system..." and until recently you would have been correct. While we have not historically built forming shoes systems, remember that EDL "...configures systems that meet special and often unique customer requirements".

In the past several months, two new customers were unable to identify available systems that met their needs. The systems on the market were either not robust enough to handle the heavy duty and dirty environment requirements, or the supplier was not willing to integrate their system to function with a robotic palletizer system.

In both cases we listened, studied, designed, and delivered value added forming shoe systems to automatically wrap rolled roofing material and variable length expansion joints. If you know of manufacturers of one or both of these products, or have manufacturers of any similar products in your area, please investigate their processes and wrapping needs.

The video for this system and many others can be viewed via the "Login" section of the EDL website at www.edlpackaging.com. Login is: edlpackaging and the password is: clients. Please contact your EDL Area Sales Manager for further information.

EDL Standard Equipment

In addition to our acclaimed reputation for delivering "special and often unique" packaging solutions, EDL also supplies a line of standard equipment. Our pre-engineered products include inline, side feed, and semi-automatic systems that can be readily applied to meet and exceed the needs of more common applications. Competitive pricing and short delivery lead times are available on all EDL standard equipment. We delivered a standard system this month in less than 2 weeks from

receiving the purchase order. Give our standard equipment line a try. Learn more at www.edlpackaging.com/edlproducts.html , and then select Bagged, Trayed, or Trayless products. Contact your EDL Area Sales Manager for further information.
