

“EDL provides technologies and engineering to configure systems that meet special and often unique customer requirements. We listen, study, design, and deliver value.”

EDL's Inline Automatic Panel Pack Wrapping System

The system for June is an Inline Automatic Panel Wrapping System. The system can handle panels that range in size from 72" to 96" wide and 36" to 96" long and are accepted by random from the machine up to 5 panels per minute.

How it works - The 3 panel assembly stations are equipped with automated pick-and-place units to load the infeed conveyor of the wrapper. The infeed conveyor advances the panels through the web of film, across the seal jaw, and onto the transfer conveyor. The seal jaw closes behind the panel creating a sleeve. The transfer conveyor indexes the pack to the side sealing position. The side seal jaws closes completing a total enclosure around the pack. Once the pack is complete it is conveyed out of the system and is ready to be palletized.

EDL's Panel Pack System provides solutions for manufacturers to enclose large, variable sized products. In this example, random printed film was used. The system could also use translucent or opaque low density polyethylene film.

The flat panel markets offer great opportunities for EDL. We encourage all EDL Partners to aggressively pursue the flat panel, office furniture, window, and door markets.

Options for the Inline Automatic Panel Pack Wrapping System:

- *No shrink tunnel is needed – saving you money on energy*
- *Total enclosure no shrink with opaque random film*
- *Total enclosure with shrink, using high clarity film to show product*

Why EDL?

EDL has over 40 years of experience designing and manufacturing shrink bundling machinery. The expertise gained and the technology developed over the years has helped us become an industry leader in innovative packaging solutions.

Bring us your application and let us apply our Innovative Solutions! Remember: We listen, study, design, and deliver value to our customers!

The video for this system mentioned above and many others can be viewed via the “Login” section of the EDL website at www.edlpackaging.com. *Login:* edlpackaging *Password:* clients. Please contact your EDL Area Sales Manager for further information.

EDL's Standard Equipment

In addition to being known for delivering “special and often unique” packaging solutions, EDL also supplies a line of standard equipment. Our pre-engineered products include inline, side feed, and semi-automatic systems that can be readily applied to meet and exceed the needs of more common applications. Competitive pricing and short delivery lead times are available on all EDL standard equipment.

This month we are also featuring our EDL Monobloc Side Feed Automatic Wrapper and Shrink Tunnel System.

Model: SFA 22-8 with ST 22-12-45

- Will wrap packs requiring up to 22” film width, up to 12” length and up to 12” high, can be modified to run longer products.
- Speed of up to 10 packs per minute (dependent on pack size)
- Standard electrical supply of 460 volts, 3-phase, 60 Hz
- QUICK DELIVERY!

COST: \$ 63,137

Give our standard equipment line a try. Learn more about our standard equipment at www.edlpackaging.com/edlproducts.html, and then select Bagged, Trayed, or Trayless products. Contact your EDL Area Sales Manager for further information.

EDL SALES TEAM

Quote of the day:

90 years ago, Robert Frost said "Two roads diverged in a wood, and I- I took the one less traveled by, and that has made all the difference."

Today, just about every business is facing very divergent roads. There is the road of despair, blaming the current economy for poor sales, falling profits, and general doom and gloom. This is the road most traveled.

The other road is traveled by savvy business owners who are committed to working smarter, not harder, and using tested and proven marketing strategies to double their sales. And for them, this will make all the difference.

Which road are you on?
