**Robotics for
End-of-Line Packaging Equipment**

EDL Packaging Engineers, Inc. is pleased to present you with the 1st issue of our E-Update Newsletter. We look forward to providing you with solutions to your end-of-line packaging needs.

*Here's a closer look at just one of our packaging solutions:
Pick and Place with Vision Guided Robotics.*

**Robotics for End-of-Line Packaging Equipment -
Available for a Wide Variety of Applications**

At the recent Pack Expo trade show in Las Vegas, EDL Packaging showcased the Double Tight Wrap bundling system with pick and place vision guided robotics.

The pick and place robotics feature is also available with many other EDL Packaging machinery models -- not just the Double Tight Wrap. EDL's family of end-of-line packaging machinery includes the In-line Automatic, Side Feed Automatic, Continuous Motion, Roll Wrapper, and many other models that can be customized to utilize pick and place.

Other applications that could utilize this state-of-the-art technology include (but are not limited to):

- Panel products such as fence panels & other panel products
- Medical devices
- Bagged products -- to name just a few!

For further information, contact us today. Make sure to visit our web site at www.edlpackaging.com for further information on our wide variety of end-of-line packaging equipment.

EDL Packaging Machinery is built to last!

- Modular construction for maximum flexibility
- Historically proven integrated servo technology
- Heavy-duty, welded tubular stainless steel frame construction for reduced mechanical vibration
- Built for reliable, 24-hour a day operation
- Backed by EDL's warranty and outstanding customer service
