

“EDL provides technologies and engineering to configure systems that meet special and often unique customer requirements. We listen, study, design and deliver value.”

EDL's Roll Wrapping System

EDL Packaging Engineers is very active in the Roll Wrapping market. Productivity improvements and cost reduction are two of the primary benefits of the EDL Roll Wrapping System. They are suitable to wrap carpet cushion, carpet padding, felt products, rugs, insulation and any other rolled products.

EDL ROLL WRAPPING SYSTEM

Features of the EDL Roll Wrapping System:

- *Handles random diameter and lengths*
- *Process up to 12 plus rolls per minute*
- *From single production line applications to multi- line packaging consolidation*

Benefits of EDL Roll Wrapping System:

- *Reduce labor costs that are derived from an automatic system.*
- *Prevent safety issues and workman's comp claims resulting from manual handling.*
- *Increase productivity- EDL's Roll Wrapping Systems have the potential to more than double your packaging rate and efficiency!*
- *Reduce material costs*
- *Create a more durable high performance package that also looks more appealing.*

Why EDL?

EDL has over 40 years of experience designing and manufacturing shrink bundling machinery. The expertise gained and the technology developed over the years has helped us become an industry leader in innovative packaging solutions.

Bring us your application and let us apply our Innovative Solutions! Remember we listen, study, design and deliver value to our customers!

The video for these systems mentioned above and many others can be viewed via the “Login” section of the EDL website at www.edlpackaging.com. Login is: edlpackaging and the password is: clients. Please contact your EDL Area Sales Manager for further information.

EDL's Standard Equipment

In addition to being known for delivering “special and often unique” packaging solutions, EDL also supplies a line of standard equipment. Our pre-engineered products include inline, side feed, and semi-automatic systems that can be readily applied to meet and exceed the needs of more common applications. Competitive pricing and short delivery lead times are available on all EDL standard equipment.

This month we are featuring our Single Tight Wrapper. EDL has enabled a customer to automatically tight band bundles of tea in a print registered sleeve of low density polyethylene film. This system can wrap over 16 packs per minute,

EDL's Single Tight Wrapper

Give our standard equipment line a try. Learn more about our standard equipment at www.edlpackaging.com/edlproducts.html, and then select Bagged, Trayed, or Trayless products. Contact your EDL Area Sales Manager for further information.

A Note From Bert:

It was great to be a Pack Expo 2007 exhibitor in Las Vegas. Thanks to everyone that was able to stop by our booth and meet us in person. We are busy working on all of the activity generated from the show!
