### Welcome to EDL's E-Update Newsletter

*For this month's distributors' newsletter, we're reviewing one of EDL's stock solutions for shrink bundling applications.*

### MSA - Monobloc Semi-Automatic Bundling System

Ideal for contract packagers, low-volume manufacturers and others seeking flexibility and low capital cost.

- Capable of bundling and wrapping a wide variety of consumer or industrial products
- Unit comes **complete** with a high efficiency shrink tunnel
- Semi-automatic loading station enables products to be bundled in random order
- Compact footprint with heavy duty, single frame construction
- Handles trayed or trayless products

Systems in stock and available for quick turn-around for package sizes:

Film Width: 32" - Package Height: 12"

Film Width: 42" - Package Height: 20"

Other sizes available to order

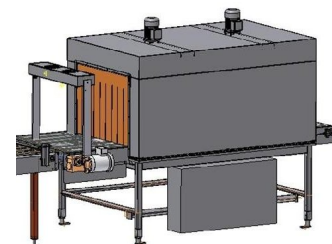

For further information, take a look at a video of the MSA in action:

### Shrink Tunnels

Keep in mind that our Shrink Tunnels are available for shipment in one week from receipt of order!

- For 16"/22"/32"/42" wide film

- For either: 12" or 20" product height

### EDL Packaging Machinery is built to last!

- Modular construction for maximum flexibility
- Historically proven integrated servo technology
- Heavy-duty, welded tubular stainless steel frame construction for reduced mechanical vibration
- Built for reliable, 24-hour a day operation
- Backed by EDL's warranty and outstanding customer service
