

EDL's Compact, Economical Solution for Contract Packagers and Low Volume Manufacturers

The EDL Monobloc Semi-Automatic Bundling System will be on display at Pack Expo International 2008 in our booth S-2278. From our Standard Integrated Engineered System range, this simple, cost-effective, and flexible system is ideally configured for contract packagers, low-volume manufacturers, and others that seek flexibility and low capital cost.

The system featured at Pack Expo this year is a model MSA 22-12. It is able to accommodate many different products such as mixed multipacks, club store packs, trayless personal care products, etc... The system will wrap packs requiring up to 22" film width, up to 12" in height, and up to 14" length and has a very compact footprint.

The Monobloc Semi-Automatic System is an example of EDL's innovative approach to meet our customers' needs. The Standard Integrated System Range offers pre-engineered systems available with short lead times while maintaining EDL's rugged construction and standard 2 year warranty. **We listen, study, design, and deliver value!**

We look forward to seeing you in Chicago!
