

FLOOR PLAN

NOTE WORKING HEIGHT 34.5" TO 37.5"
NOTE ALL DIMENSIONS ARE ± 1 INCH

TECHNICAL SPECIFICATIONS

Systems Available For

- Product Types:** Vinyl and Aluminum Pipe, Profiles, & Tubing
- Product Sizes:** 2' – 25' in length and 6" – 4' in width
- Pack Types:** Total enclosure
- Line Speed:** 2 – 15 packs per minute
- Film Type:** LDPE, clear, tinted, or printed film

Options Available

- ◆ Random printed film can be utilized to display graphics
- ◆ Film perforation units for easy-open packs, allows pack to remain intact after partial content removal
- ◆ Machine can be fitted with feet or with castors to enable it to be moved easily

Standard Features

- ◆ Heavy-duty painted steel frame provides durability in multi-shift environment
- ◆ Allen Bradley PLC for reliable operation
- ◆ Touch Screen Control Panel for operator interfacing
- ◆ Linear bearings provide precise guidance for efficient machine operation
- ◆ Automatic film feed meters film to prevent over runs and reduce tension
- ◆ Low energy shrink tunnel saves energy and keeps operating costs down
- ◆ Directable airflow in shrink tunnel ensures uniform film shrinkage
- ◆ Film cooler sets film prior to handling to maintain pack integrity

PIPE, PROFILE, & TUBING UNITIZED, CONTAINED, & PROTECTED

Unitizing lengths of extruded product can be costly and labor intensive. EDL offers a solution with its EXTRUDA-PACK range of equipment, designed for use in the Extrusion Industry to provide a cost effective, automatic means of containing and protecting products for transit and storage; and automated systems for unitizing packs into bulk shipping loads.

EXTRUDA-PACK -
your product
contained and
protected

PIPE, PROFILE & TUBING UNITIZED, CONTAINED & PROTECTED

EXTRUDA-PACK Systems...

Packaging Systems - Contain and Protect

Integrated Engineered Systems - Unitize, Contain, and Protect

Model Name: EXTRUDA-PACK

EXTRUDA-PACK Systems...

- ⊗ are purpose designed and engineered for extruded products
- ⊗ can be further customized to meet your specific requirements
- ⊗ will accommodate your extruded products up to the longest shippable length
- ⊗ can count, collate, and format your products to your requirement
- ⊗ are engineered to meet your highest standards
- ⊗ are modular to meet your changing needs
- ⊗ can be integrated into your production lines
- ⊗ are conceived and engineered to be cost effective
- ⊗ will handle supported or unsupported products
- ⊗ will provide total film wrap enclosure
- ⊗ will protect your product with selected poly film
- ⊗ will enhance your product with optional random printed film
- ⊗ are supported by skilled application and field engineering personnel

- ◆ **EXTRUDA-PACK SA** - Semi-Automatic wrapping and film shrinking system for lower volumes and start-up operations
- ◆ **EXTRUDA-PACK Auto 6** - Automatic wrapping and film shrinking system for pre-unitized cut lengths with dimensions up to 6ft in length and 2ft in width
- ◆ **EXTRUDA-PACK Auto 25** - Automatic wrapping and film shrinking system for pre-unitized cut lengths with dimensions up to 25ft in length and 4ft in width

- ◆ **EXTRUDA-PACK IES 6** - Automatic wrapping and film shrinking system which also counts, collates, and formats extruded lengths with dimensions up to 6ft in length and 2ft in width
- ◆ **EXTRUDA-PACK IES 25** - Automatic wrapping and film shrinking system which also counts, collates, and formats extruded lengths with dimensions up to 25ft in length and 4ft in width
- ◆ **EXTRUDA-PACK Horizontal** - Total enclosure wrapping for decorative retail packaging
